

Kimberly Cofer

Vent RN Nurse • North Capitol Nursing & Rehabilitation

Kimberly Cofer began her career in healthcare during high school. It was then that she became certified as a Nursing Assistant. She worked as a Nursing Assistant for approximately four years when she decided to elevate to the position of Registered Nurse. She has worked as an RN for two years with North Capitol Nursing & Rehabilitation on the Vent Unit which cares for those with some of the highest medical needs. Kimberly has taken on this role and has been nothing short of successful on this unit. Her next big adventure will be completing her BSN program with Harrison College this December. When asked what advice she would give to others coming into the nursing profession she states, “Show up every day to do your personal best!”

Kimberly’s team members often say that she is one of the most caring and compassionate people they know. Residents say they know when she is present, everything will be just fine. Kimberly says she enjoys knowing she makes a difference and believes that being a nurse is about more than passing medicine or following doctor’s orders. It is about compassion!

When away from work, Kimberly’s passion and relaxation includes time with her fiancé and two children.
