

ASC, HHC foot the bill for caregiver education

American Senior Communities and its partner, the **Health and Hospital Corporation**, are paying it forward to 14 ASC employees.

Each of the 14 employees according to ASC's announcement, will be included in the **Opportunities to Nursing Excellence** scholarship program. Through O2NE, caregiving staff will be able to take classes to enrich their nursing skills and increase educational attainment while also maintaining their jobs at ASC facilities.

The perks of this program include tuition and books paid in full by the caregivers' employers and a 30-hour workweek for which those students will still be paid for 40 hours. Mentoring and counseling services will also be made available to the O2NE participants.
