South Bend Senior Community Receives Perfect Survey from Indiana State Dept. of Health

SOUTH BEND, IN (April 29, 2025) – Cardinal Nursing & Rehabilitation has received a 100% deficiency-free survey from the Indiana Department of Health. State surveys are conducted annually through unannounced visits that include a comprehensive assessment of the facility's compliance with state and federal regulations and guidelines.

A 100% Deficiency-Free survey is the highest rating achievable, indicating the facility is meeting or exceeding the required standards put in place. Survey inspectors examine staff-to-resident ratio, safety guidelines, adherence to resident rights, cleanliness, infection control, accuracy of medical records, a check of policies, and review of all services provided. Most importantly, treatment of residents and their overall quality of life are explored, often including interviews with residents and their family members.

CEO Steve Van Camp said, “The dedicated team at Cardinal Nursing & Rehabilitation have shown that they live and work by our core CARE (Compassion, Accountability, Relationships, Excellence) values. These values serve as the guiding principles that lead us in our service to residents, their families, and our employees. A 100% deficiency-free survey can only be achieved when staff are highly aligned in their level of dedication, and work seamlessly as a team to reach, and then maintain these high standards. We are incredibly proud of them and congratulate the entire team.”
