Mount Vernon Nursing and Rehabilitation Earns 100% Rating in Annual State Inspection

MOUNT VERNON, IN. - Mount Vernon Nursing and Rehabilitation has achieved a 100% deficiency-free survey following its recent annual inspection conducted by the Indiana Department of Health (IDOH). A deficiency-free survey is the highest outcome a nursing facility can earn, confirming that Mount Vernon Nursing and Rehabilitation is meeting, and in many cases exceeding, the standards established and closely monitored by state health officials.

IDOH surveys are performed through unannounced visits and include an extensive review of compliance with state and federal regulations. Inspectors evaluate staff-to-resident ratio, safety protocols, infection control, resident rights, cleanliness, accuracy of medical records, organizational policies, and the full scope of services provided. The process also places significant emphasis on the treatment of residents and their quality of life, often incorporating direct interviews with residents and their family members.

Steve Van Camp, CEO of American Senior Communities, commended the achievement, stating: "This result reflects something truly exceptional. The team at Mount Vernon Nursing and Rehabilitation demonstrates every day what it means to live our CARE values—Compassion, Accountability, Relationships, and Excellence—not as words on a wall, but as the foundation for how they serve others. A 100% deficiency-free survey is not earned by chance; it is the outcome of unwavering dedication, consistent excellence, and a shared commitment to doing what is right for residents and their families. We are tremendously proud of this team and grateful for the standard of care they continue to uphold."

Mount Vernon Nursing and Rehabilitation extends its appreciation to residents, families, and team members for their ongoing trust and partnership as the community continues its mission of delivering exceptional care close to home.
