Fairway Village Receives Perfect Annual Survey from State Department of Health

INDIANAPOLIS, IN (March 31, 2026) – Fairway Village, a member of American Senior Communities, has once again earned a deficiency-free annual state inspection from the Indiana State Department of Health, marking its second consecutive year receiving this top distinction. A deficiency-free survey is the highest rating a senior care community can achieve and is attained by only a small percentage of providers annually.

Every year, senior care communities are evaluated through unannounced inspections conducted by the Indiana State Department of Health. These comprehensive reviews assess a wide range of areas, including facility cleanliness, regulatory compliance, safety protocols for residents and staff, dietary services, recordkeeping, staffing levels, and overall quality of care. Inspectors also gather feedback through interviews with residents, their families, and team members to ensure a well-rounded evaluation.

American Senior Communities CEO Steve Van Camp shared, “Earning a deficiency-free survey two years in a row speaks volumes about the consistency, accountability, and heart this team brings to their work. They are committed not only to meeting expectations, but to creating a supportive environment where residents feel respected, cared for, and truly at home. This recognition reflects their daily dedication to doing things the right way, and we are incredibly proud of their achievement.”
